INTERIM CONDENSED FINANCIAL STATEMENTS

30 JUNE 2015 (UNAUDITED)

REPORT ON REVIEW OF INTERIM CONDENSED FINANCIAL STATEMENTS TO THE SHAREHOLDERS OF EMIRATES INVESTMENT BANK P.J.S.C.

Introduction

We have reviewed the accompanying interim condensed statement of financial position of Emirates Investment Bank P.J.S.C. (the “Bank”) as at 30 June 2015 and the related interim condensed statements of income and comprehensive income for the three month and six month periods then ended, and the related interim condensed statements of cash flows and changes in equity for the six month period then ended and explanatory notes. Management is responsible for the preparation and presentation of these interim condensed financial statements in accordance with International Accounting Standard 34, Interim Financial Reporting (“IAS 34”). Our responsibility is to express a conclusion on these interim condensed financial statements based on our review.

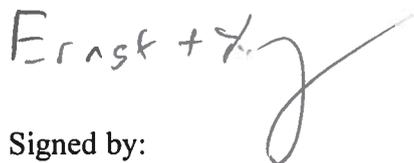

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently, it does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed financial statements are not prepared, in all material respects, in accordance with IAS 34.

1 INCORPORATION AND ACTIVITIES

Emirates Investment Bank P.J.S.C. (the “Bank”) was incorporated on 17 February 1976 in Dubai, United Arab Emirates by a decree of HH The Ruler of Dubai. In 1999, the Bank was registered under the UAE Commercial Companies Law No. (8) of 1984 (as amended) as a Public Joint Stock Company. During 2010, the Bank changed its name to Emirates Investment Bank PJSC. The Bank is engaged in the business of private banking and investment banking. The address of the Bank’s registered office is P. O. Box 5503, Dubai, United Arab Emirates.

The Bank is a subsidiary of Al Futtaim Private Company LLC which holds 52.85% of the shares in the Bank.

2 ACCOUNTING POLICIES

Basis of preparation

The interim condensed financial statements of the Bank are prepared in accordance with International Accounting Standard 34, Interim Financial Reporting.

The interim condensed financial statements do not contain all information and disclosures required for full financial statements prepared in accordance with International Financial Reporting Standards, and should be read in conjunction with the Bank’s annual financial statements as at 31 December 2014. In addition, results for the six months ended 30 June 2015 are not necessarily indicative of the results that may be expected for the financial year ending 31 December 2015.

New standards, interpretations and amendments

The accounting policies adopted in the preparation of the interim condensed financial statements are consistent with those followed in the preparation of the Bank’s annual financial statements for the year ended 31 December 2014, except for the adoption of new standards and interpretations effective as of 1 January 2015.

The Bank applies, for the first time, certain standards and amendments. As required by IAS 34, the nature and the effect of these changes are disclosed below.

Several other new standards and amendments apply for the first time in 2015. However, they do not impact the annual financial statements of the Bank or the interim condensed financial statements of the Bank.

The nature and the impact of each new standard/amendment is described below:

Amendments to IAS 19 Defined Benefit Plans: Employee Contributions

IAS 19 requires an entity to consider contributions from employees or third parties when accounting for defined benefit plans. Where the contributions are linked to service, they should be attributed to periods of service as a negative benefit. These amendments clarify that, if the amount of the contributions is independent of the number of years of service, an entity is permitted to recognise such contributions as a reduction in the service cost in the period in which the service is rendered, instead of allocating the contributions to the periods of service. This amendment is effective for annual periods beginning on or after 1 July 2014. This amendment is not relevant to the Bank as there is no defined benefit plan with contributions from employees or third parties.

The Bank has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

5 INVESTMENTS (continued)

Part of the proprietary investment portfolio of the Bank having a carrying value of AED 76 million (2014: AED 116 million) is pledged as collateral with banks against credit facilities and repurchase agreements totaling to AED 57 million (2014: AED 85 million).

The Bank uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As at 30 June 2015, the Bank held the following investments measured as follows:

5 INVESTMENTS (continued)

During the current period, investments amounting to Nil (2014: AED 12,101 thousand) was transferred from Level 1 to Level 2 as quoted prices for such securities are no longer regularly available.

Investments amount to Nil (2014: AED 62,125 thousand) was transferred from Level 2 to Level 1. The transfers from Level 2 to Level 1 were made in 2014 as the market in respect of these securities was considered to be active again. Investment under Level 2 fair value hierarchy is valued using latest available asset value.

The following table shows a reconciliation of the opening and closing amounts of level 3 investments recorded at fair value:

	<i>30 June 2015 AED'000 (Unaudited)</i>	<i>31 December 2014 AED'000 (Audited)</i>

At the end of the period	<u>17,731</u>	<u>17,898</u>

The Bank has assessed the sensitivity of the fair value measurement of investments under level 3 due to changes in inputs used. Based on the assessment, no major changes in the fair value of investments under level 3 are noted as at 31 December 2014. Such an assessment is performed on an annual basis by observing the changes in unobservable inputs which might result in higher or lower fair value measurement.

9 BASIC AND DILUTED EARNINGS PER SHARE

Basic earnings per share of AED 39.76 is calculated by dividing the profit of AED 27,831 thousand for the six months period ended 30 June 2015 (30 June 2014: AED 35,288 thousand) by the weighted average number of shares outstanding during the period of 700,000 of AED 100 each (30 June 2014: 700,000 shares of AED 100 each).

The earnings per share of AED 50.41 as reported for the six months period ended 30 June 2014 (previously reported as AED 54.29) are adjusted for the effect of the shares issued in 2015 as a result of the stock dividend. The figures for basic and diluted earnings per share are the same as the Bank has not issued any instruments which would have an impact on earnings per share when exercised.

10 SEGMENTAL ANALYSIS

For operating purposes, the Bank is organised into two major business segments: (a) Investments which is principally involved in managing the Bank's own investment portfolio and provides treasury services; and (b) Banking Services, which principally manages client's investment portfolio, provides credit facilities, accepts deposit from corporate and individual customers and provides advisory services on corporate finance and capital market transactions. These segments are the basis on which the Bank reports its primary segment information. Transactions between segments are conducted at rates determined by management taking into consideration the cost of funds and an equitable allocation of expenses.

Management monitors the operating results of the operating segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss.

Unutilised committed credit facilities*	23,729	20,954
	<u>91,092</u>	<u>100,817</u>

The Bank has no commitments on account of investments made in securities and limited partnership funds.

* Unutilised committed credit facilities represent a contractual commitment to permit draw downs on a facility within a defined period subject to conditions precedent and termination clauses. Since commitments may expire without being drawn down, and as conditions precedent to draw down have to be fulfilled, the total contract amounts do not necessarily represent exact future cash requirements.

13 DERIVATIVE FINANCIAL INSTRUMENTS

In the ordinary course of business the Bank enters into transactions that involve derivative financial instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in price in one or more underlying financial instrument, reference rate or index. The purpose of derivative financial instruments in the Bank's business is to mitigate the risks arising from default, currency and interest fluctuations and other market variables. The Bank uses forward foreign exchange contracts to mitigate the currency risk on certain investments.

The table below shows the fair values of derivative financial instruments, recorded as assets or liabilities, together with the notional amounts. The notional amount, recorded gross is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the period end and are neither indicative of the market risk nor credit risk.

---------------------------------------	------------	--------------	----------------	--------------	--------------	----------------

Derivative financial instruments include forward foreign exchange contracts. These instruments are entered into for a period of up to five years. The Bank has twenty seven forward foreign exchange contracts (2014: eleven) outstanding as at 30 June 2015.

Derivatives often involve at their inception only a mutual exchange of promises with little or no transfer of consideration. A small movement in the value of the asset, rate or index underlying a derivative contract may have an impact on the profit or loss of the Bank. The Bank's exposure under derivative contracts is closely monitored as part of the overall management of the Bank's market risk.

Derivative product type***Forwards***

Forwards are contractual agreements to either buy or sell a specified currency, commodity or financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in over-the-counter markets.

Fair value

The derivatives are recorded at fair value by using the published price quotations in an active market or counterparty prices or valuation techniques using a valuation model that has been tested against the prices of actual market transactions and the Bank's best estimate of the most appropriate model inputs.

Foreign exchange forward contracts are valued using valuation techniques, which employs the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying commodity.

Derivative related credit risk

Credit risk in respect of derivative financial instruments arises from the potential for a counterparty to default on its contractual obligations and is limited to the positive fair value of instruments that are favourable to the Bank. With gross-settled derivatives, the Bank is also exposed to a settlement risk, being the risk that the Bank honours its obligation, but the counterparty fails to deliver the counter value.

The changes in counterparty credit risk had no material effect on the hedge effectiveness assessment for derivatives designated in hedge relationships and other financial instruments recognised at fair value.
