

ACTIVE GROWTH MODEL PORTFOLIO

Investment Objective

An Active Growth profile seeks to aggressively generate long-term capital appreciation by investing the bulk of its assets in growth investments such as equities.

Strategic Asset Allocation

	70% is invested in Equities
	10% is invested in Fixed Income
	5% is invested in Real Estate
	5% is invested in Commodities
	5% is invested in Alternatives / Low volatility strategies
	5% is invested in Cash or Cash Equivalents

Portfolio Model Rationale

- Model is suited for investors with high return expectations
- A typical "Active Growth" investor is experienced and has a high risk tolerance and is prepared to tolerate high volatility in order to achieve long-term capital appreciation
- Recurring income is not a requirement
- Desire returns that exceed inflation
- Have an investment horizon of 7 years and above
